

BOSSTAG X18 MINI - WITH PIN

Security: High
Detection Range: Standard

High Security resists removal by low powered magnets

AM Frequency Tag

Requires High Security XT Detacher

Small size – 2.2"

Includes smooth pin

Accepts Ink Pins and RFID Pins

Sensormatic and other AM systems compatible

If you find tags in your store that have clearly been removed by shoplifters who have suitable high powered magnets, now easily sourced and purchased online, then you need this tag.

These small lightweight sized tags will fit in seamlessly with your existing tagging strategy. Our XT tags comes in two sizes – BossTab X18 and XT30.

We have increased the tags internal mechanism strength so these magnets will not allow the pin to be removed. All you require is our XT Lock Detacher and your store security is significantly upgraded.

Benefits

Size: 2.2" long

XT Lock: Common Superlock and Standard Lock magnetic detachers are unable to release the pin from this tag. The high strength lock mechanism in the X18 renders weaker detachers that may be used by shoplifters useless. Our XT Lock detachers can open this tag and just about any other magnetic tag.

Smooth Pin Included: The tag accepts smooth, grooved pins and a variety of lanyards and ink pins. The smooth pin will not damage threads like grooved pins do. Attach tags in a visible position and deter shoplifters from cutting garments. Faster application and removal with a smooth pin.
